Office Action Summary

Art Unit: 2826

Serial Number: 09/475104 Attorney's Docket #:042390.P6785

Filing Date: 12/30/99;

Applicant: Vodrahalli et al.

Examiner: Alexander Williams

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1 to 4, drawn to a device for an integrated circuit package, classified in Class 257, subclass 738.

II. Claims 5 to 12, drawn to a method for assembling an integrated circuit, classified in Class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentability of the group I invention would not necessarily imply unpatentability of the method of the group II invention, since the device of the group I invention could be made by processes materially different than that of the group II invention, for example, instead of curing the epoxy with energy at a microwave frequency, it can be performed with heat.

Art Unit: 2826

Because these inventions are distinct for the reasons given above and, as shown by the above different classifications, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Applicant is reminded of the notice published in the Official Gazette on March 26, 1996, "Guidance on Treatment of Product and Process Claims in Light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)." If, in response to a requirement for election between a product and a process of making, Applicant elects claims to the product, and the product is subsequently found allowable, withdrawn process claims *which depend from, or otherwise include, all the limitations of the allowable product* will be rejoined. Those process claims which do not depend from, or otherwise include, all the limitations of the allowable product will not be rejoined. Rejoined process claims will be fully examined for patentability under 37 CAR § 1.104 to 1.106. Process claims which depend from, or otherwise include, all the limitations of a patentable product claim will be entered as a matter of right if the amendment is presented prior to final rejection. Rejoinder does not constitute a withdrawal of the requirement for restriction (but is a new procedure authorized under the OG notice).
